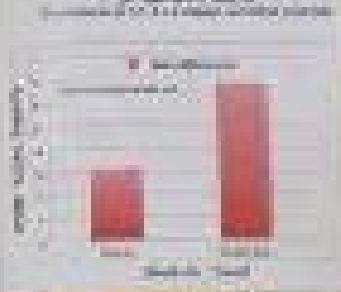
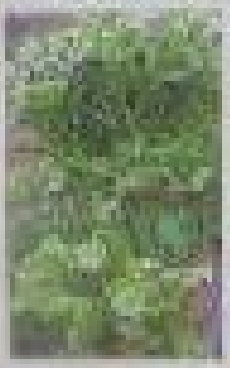
New Generation
Microbial Rock Minerals
help plants meet
Weather Extreme Challenges.
Address Environmental Issues

Earthlife Rock Minerals

1. Increases soils life energy activity
2. Doubles the soil's water holding capacity
3. Makes plants more resilient to hot, dry, wet or cold conditions
4. Reduces nitrate leaching and pesticide contamination of the environment





Seedlings were [illegible] in 40°C+ heat. Photo taken [illegible] weeks]

Earthlife Lawn Blend Other Fertiliser
Enduring 2 months 40°C heat
